TOP-DRESSING SAND FOR GOLF COURSES

Product description

Top-dressing sand is manufactured from natural sand. The sand is precision sieved to the desired fractions. The dust removal system at our plant considerably reduces the amount of fine particles in the sand, resulting in significantly less dust at the application stage compared to regular sand. The removal of excess dust also improves conditions at the putting green.

Waste handling

Storage and handling of waste
See the separate storage and disposal instructions https://www.fescon.fi/en/material-bank
